

Pediatric Rehabilitation Intervention Measure of Engagement (PRIME) suite

The tools in the Pediatric Rehabilitation Intervention Measure of Engagement (PRIME) suite are designed to measure the engagement of children and youth, parents, and service providers involved in rehabilitation therapy.

The PRIME suite was developed by an interdisciplinary group of researchers, clinicians, and family partners from across Canada, the United States, and Australia.

To be notified when additional PRIME measures become available, you can join the PRIME mailing list at <http://eepurl.com/hnn72z>.

More detailed information about this research is available on the PRIME website at primeresearchteam.com, or please visit hollandbloorview.ca/prime-suite.

Published PRIME measures can be downloaded from Flintbox:

1) **PRIME – Parent** at bit.ly/PRIME-P

2) **PRIME – Service Provider** at bit.ly/PRIME-SP

3) **PRIME – Observation** at bit.ly/PRIME-O
